

FORMIT SB59 STEEL BODY

PORTABLE TOILET SYSTEM

THE HIGHLY DURABLE STEEL BODY MAKES THE **FORMIT SB59** IDEALLY SUITED FOR USE ON ANY MINING OR BUILDING AND CONSTRUCTION SITES.

The Formit SB59 is known to be the toughest, most durable and cost effective portable toilet in the Australian market. This product is built tough from the ground up, starting with the galvanised steel skid, Colourbond walls and large waste and water tank storage units. The sturdy galvanised lifting lugs form part of the structural assembly and are connected to the external steel braces linked to the unit's skid base. The Formit SB59 is a fresh water flush unit allowing all users to wash their hands, providing a safer, healthier environment for workers and users alike. However it is also available in a 'straight drop' or non fresh water flush version.
